*The French Revolution of 1789 was a **cataclysm** whose effects are still felt today.*

***catalyst** *n.* something causing change

Among the catalysts of the Romantic movement were the libertarian ideals of the French Revolution.

Terms from the Arts, Sciences, and Social Sciences

Romantic movement: a late eighteenth- and nineteenth-century movement in literature and the arts. The movement was a very varied one, and so is not easily described in a few words. Romanticism was a revolt against classicism and reason and emphasized the individual and the emotional. The Romantics also stressed the inherent goodness of man and nature and valued freedom highly. Important Romantic poets in England include William Blake, John Keats, William Wordsworth, and P. B. Shelley. Famous Romantic composers include Hector Berlioz, Franz Liszt, and Frederic Chopin.

libertarian: libertarians place great importance on individual freedom. They believe that no limitations should be placed on a person's freedom unless that person's actions limit the freedom of others.

French Revolution: a crucial period (1789–1799) in French, and more generally, Western civilization. France's absolute monarchy was replaced by republicanism. It is regarded by most historians as a major turning point in Western civilization, ushering in the era of citizens as the major force in politics.

APPLYING YOUR KNOWLEDGE—11-20

1. During World War II, President Truman faced (i) _____ when he had to choose between two morally (ii) _____ alternatives: allow the war against Japan to continue at the cost of hundreds of thousands of lives, or bring it to a swift end by inflicting catastrophic damage on Japan with the atomic bomb, forcing it to (iii) _____.

| Blank (i) | Blank (ii) | Blank (iii) |
|-------------|------------|-------------|
| a conundrum | repugnant | attack |
| a cataclysm | relative | capitulate |
| a canard | analogous | implode |

Explanation: An important clue is the phrase “had to choose,” which suggests that President Truman faced a difficult choice. This makes *conundrum* (puzzle with no solution) an appropriate choice for Blank (i).

Repugnant (distasteful; offensive) is a good choice for Blank (ii) because it helps create a sentence describing the difficult choice between two alternatives, both of which presented serious moral difficulties. For Blank (iii) *capitulate* (surrender) is the best choice. This is signaled by the phrase “bring it [the war] to a swift end.”

The correct answers are **a conundrum**, **repugnant**, and **capitulate**.

2. NASA’s Apollo missions in the late 1960s and early 1970s may have played a significant role in (i) _____ the environmental movement by helping to put Earth’s ecosystem in a (ii) _____ perspective: photographs of (iii) _____ Earth from space perhaps encouraged many people to reflect on the folly of disrupting such a beautiful and intricately interrelated biosphere.

| Blank (i) | Blank (ii) | Blank (iii) |
|---------------------------|--------------|--------------------|
| hastening the demise of | hypothetical | a pristine-looking |
| alleviating problems in | cosmic | an apposite |
| crystallizing support for | canonical | an antediluvian |

Explanation: The independent clause after the colon describes photographs of Earth from space. This signals that the best choice for Blank (ii) is *cosmic* (relating to the universe as distinct from Earth). An important clue to Blank (iii) is “such a beautiful and intricately interrelated biosphere,” which suggests that Earth was *pristine-looking*. The answer to Blank (i) can now be selected. The sentence says that photographs of Earth from space may have encouraged people to “reflect on the folly of disrupting such a beautiful and intricately interrelated biosphere” of Earth, so it makes sense that the Apollo missions had a part in *crystallizing support for* the environmental movement.

The correct answers are **crystallizing support for**, **cosmic**, and **a pristine-looking**.

UNIT 21

deride *v.* to mock

*Innovation often requires challenges to orthodox thinking; for example, in the late 1960s, scientists from the U.S. Department of Defense’s Advanced Research Projects Agency presented their idea of a vast network of computers to leading scientists from IBM and AT&T—companies with innumerable research breakthroughs to their credit—and were **derided** as impractical visionaries.*

APPLYING YOUR KNOWLEDGE—21-30

1. Today's technology is so diverse and complex that no one person—not even a highly trained engineer with _____ interests—can understand the inner workings of many of the devices used in modern professional equipment.

| |
|-------------|
| ephemeral |
| latent |
| existential |
| eclectic |
| liberal |

Explanation: An important clue to the answer to this question is the word “diverse” that describes today’s technology. Because of this diversity, even an engineer with *eclectic* (selecting from various sources) interests cannot understand the processes involved in the operation of many modern devices.

The correct answer is **eclectic**.

2. In *Beyond Freedom and Dignity*, B.F. Skinner maintains that (i) _____ the source of all behavior is located in the environment

and not in people, it follows that modifications of the environment will in turn change behavior. He terms this indirect (ii) _____ of people “behavioral technology.” Skinner proposes that in order to produce and maintain a “good” society, it is necessary to construct an environment in which desirable behaviors are rewarded and in this way reinforced, while undesirable behaviors go unrewarded and consequently (iii) _____.

| Blank (i) | Blank (ii) | Blank (iii) |
|-----------|--------------|-------------------|
| although | manipulation | disappear |
| unless | evocation | continue to exist |
| because | admonishment | become desiccated |

Explanation: Blank (i): The clue to the answer is the phrase “it follows that.” *Because* is correct because it creates a clause that states the cause that produces consequences—that is, modifications in the environment changing behavior—that follow from the cause.

Blank (ii): The phrase “behavioral technology” signals that *manipulation* (shrewd management) of people is involved.

Blank (iii): The word “while” signals a contrast between behaviors that are “reinforced” and those that *disappear*.

APPLYING YOUR KNOWLEDGE—31–40

1. The development of antidepressant, antipsychotic, anti-anxiety, and other (i) _____ drugs has allowed treatment of conditions that in the past were (ii) _____ to therapy.

| Blank (i) | Blank (ii) |
|--------------|------------|
| hermetic | precursors |
| ineffective | impervious |
| psychotropic | analogous |

Explanation: *Psychotropic* (having an altering effect on perception or behavior) is the correct choice because the three types of drugs mentioned all affect perception or behavior. If you didn't know the meaning of psychotropic, you could still arrive at the correct answer if you knew the meaning of *hermetic* and *ineffective*, which don't make sense in context. Also, the word "psychotropic" contains the Greek root *psych* (mind), showing that the word has something to do with the mind.

Clues to the answer to Blank (ii) are the words “development” and “past.” These words tell us that drugs developed recently have made possible treatment of conditions that in the past were *impervious* (incapable of being affected) to treatment.

The correct answers are **psychotropic** and **impervious**.

2. The French writer Alexis de Tocqueville noted in his *Democracy in America* (1835) that there seems to be a (i) _____ in American society: that bastion of individualism produces a profusion of public institutions requiring (ii) _____ to create.

| Blank (i) | Blank (ii) |
|-----------|---------------------------|
| conundrum | tremendous ingenuity |
| weakness | a great collective effort |
| paradox | admirable altruism |

Explanation: The clue to the answer for Blank (ii) is “public institutions.” It makes sense that public institutions require *a great collective effort* to create. Knowing the answer to Blank (ii) allows us to select the answer for Blank (i) because “collective effort” and “individualism” are antithetical. The *paradox* (contradiction, incongruity) is that a society that values individualism produces many institutions requiring groups of people to work together.

The correct answers are **paradox** and **a great collective effort**.

APPLYING YOUR KNOWLEDGE—41-50

1. Labor unions sometimes (i) _____ the use of confrontational tactics and (ii) _____ in negotiation as necessitated by the entrenched power of big business.

| Blank (i) | Blank (ii) |
|-----------|----------------|
| justify | compliance |
| abjure | intransigence |
| criticize | submissiveness |

Explanation: An important clue to the answer to this question is the phrase "confrontational tactics," which signals that extreme methods are being discussed. The phrase "as necessitated" signals that labor unions sometimes see such tactics as necessary, so it makes sense that they would *justify* (demonstrate to be right) such tactics. Because the word for Blank (ii) is paired with the words "confrontational tactics," it should have a similar meaning, so *intransigence* (being uncompromising) is the correct answer.

The correct answers are **justify** and **intransigence**.

2. The name “impressionist” is a misnomer. Every painter is an impressionist insofar as he or she records his or her impressions, and all art is impressionistic. What Manet, the leader of the original movement, meant to say was that nature should not be painted (i) _____, but as it “impresses” the painter. He and his few followers tried to change the name to “independents,” but the original name has clung to them. Manet was extravagant in method and disposed toward low life for a subject, which has always (ii) _____ his popularity; but he was a very important man for his technical discoveries regarding the relations of light and shadow, the flat appearance of nature, and the exact value of color tones.

| Blank (i) | Blank (ii) |
|-------------------|-------------------|
| at all | militated against |
| inadvertently | added to |
| as it actually is | sanctioned |

Explanation: The words “but as it ‘impresses’ the painter” signal that the correct answer for Blank (i) is *as it actually is*.

Blank (ii): What is said about Manet in the sentence after the semicolon is positive, so what is said about Manet before the semicolon must be negative because of the word “but.” *Militated against* (exerted influence against) is the correct answer because this creates a negative statement about Manet.

The correct answers are **as it actually is** and **militated against**.

UNIT 51

miscellany *n.* mixture of writings on various subjects

- 1. In intellectual discourse, statements often must be (i) _____ so that they are true; for example, the statement "The cause of war is economic competition between countries" is almost certainly too sweeping and could be (ii) _____ by being restated as "One of the major causes of war is economic competition between countries."

| Blank (i) | Blank (ii) |
|------------|------------------------|
| refuted | rendered more credible |
| sanctioned | made more problematic |
| qualified | embellished |

Explanation: The statement in quotes about the cause of war is described as "sweeping" (too inclusive), so the best choice for Blank (i) is *qualified* (limited).

The second statement in quotes is more believable than the first statement because it has been qualified. Thus, the best choice for Blank (ii) is *rendered more credible* (made more believable).

The correct answers are **qualified** and **rendered more credible**.

- 2. Albert Einstein expressed dismay about quantum mechanics because he felt it introduced a troubling (i) _____ into nature, which he felt should be able to be described by laws that, (ii) _____, are fully testable and verifiable.

| Blank (i) | Blank (ii) |
|-------------------------|----------------------------|
| capriciousness | no matter how recondite |
| dilemma | however unscientific |
| aesthetic consideration | although empirically-based |

Explanation: An important clue to the answers to this question is the phrase “laws that... are fully testable and verifiable,” which tells what kind of laws of nature Einstein preferred. *Capriciousness* (being subject to sudden change) is the best choice for Blank (i) because this quality would make laws of nature difficult to test and verify. Another clue to this answer is the word “troubling;” Einstein found this capriciousness of nature troubling.

The answer to Blank (ii) can be found by elimination of *however unscientific* and *although empirically-based*, which make no sense in context. *No matter how recondite* is a good choice because it makes sense that it would not matter if laws of nature were recondite (abstruse) as long as they could be tested and verified.

The correct answers are **capriciousness** and **no matter how recondite**.

UNIT 71

stanch *v.* to stop or check the flow of

*The country's government has put controls on currency movement to **stanch** the flow of money out of the country.*

stentorian *adj.* extremely loud

***stigma** *n.* mark of disgrace or inferiority

*A problem with giving formal psychological treatment to a child who is believed to be poorly adjusted to society is that he may acquire a **stigma** as a result of officially being labeled as deviant, and he may act to corroborate society's expectation.*

The verb is *stigmatize*.

*The civil rights movement helped to **stigmatize** racism, augmenting legal efforts to desegregate American society.*

stint *v.* to be sparing

Stinting on funding for education strikes many people as shortsighted.

Stint is also a noun meaning a period of time spent doing something

Isaac Asimov did a short involuntary **stint** in the army as a conscript during the 1950s.

***stipulate** *v.* to specify as an essential condition

The president's lawyer **stipulated** that he would appear before the investigative committee, but would answer only questions directly relevant to the issue at hand.

The noun is *stipulation*.

Stipulations in a contract should be clear in order to obviate the need for parties to resort to litigation.

***stolid** *adj.* having or showing little emotion

Behind the professor's **stolid** appearance is a fun-loving, gregarious character.

stratified *adj.* arranged in layers

One of the implications of an increasingly **stratified** economy for America might be increased social unrest.

The noun *stratum* means a layer.

In the English-speaking world many members of the upper classes historically have had a deprecatory attitude toward slang, a form of language they regard as indecorous and thus suitable only for the lowest **stratum** of society.

The plural of *stratum* is *strata*.

As it matured as a science, geology began to complement biology, a process that helped it to gain a more comprehensive view of the history of life on Earth by allowing fossils to be dated and identified (paleontology), often using knowledge gained from stratigraphy—the study of the deposition, distribution, and age of rock **strata**.

The noun *stratification* is used in the sociological term *social stratification*. It refers to the hierarchical arrangement of individuals in a society into classes or castes.

***striated** *adj.* marked with thin, narrow grooves or channels

The **striated** surface suggested to the geologist that he was walking over an area in which there once had been a torrent of water.

Striation is the noun.
